TO THE TRADE

In spite of world wide depression, which is forcing many business houses out of existence, there are certain businesses which are making just as much or more profits than in normal years, but if you study them closely they are businesses which conform to the changing demands of the public and which supply new and novel articles in the manner the public desires.

Here lies a great lesson we can learn from them. We must stimulate our business by offering to the public something new and novel. Almost all Nurseries in this country have more nursery stock than they can sell at a profit, but who has any surplus of flowering Magnolias and hardy Azaleas in any quantity? By stimulating public interest with these novelties, you can sell more common stock in connection with them.

No matter how poor your business is, do not fail to stock up with some novelties of better kind. Devote more time on marketing them in the way the public wants them, and your business will show some profits even in depressed years.

Lower prices usually mean lower quality of stock, but foreseeing present depressed condition, we kept the quality of our stock higher than ever before, knowing that lowered prices alone would not sell goods, and that the market would be flooded with cheap quality stock. We are offering our very high quality stock at lowest price ever, because this is distinctly a buyer's market.

With deepest gratitude to you who have supported our business so loyally and with renewed assurance that each and every one of your orders will be highly appreciated and will receive my best personal attention.

Yours very truly,

T. KIYONO.

TERMS AND CONDITION OF SALES

Prices—5, 50 and 500 of same variety and size at 10, 100 and 1000 rates respectively. Where less than 25 of a kind ordered for plants quoted at 100 rate, please add 25%.

Prices in this list cancel all previous quotations, and are subject to change without notice.

Terms of Payment—Cash with order, from unknown people or those who prefer to earn discount. When cash with order, we make the discount 3% and boxing free, which means total earning of about 10%.

C. O. D. shipment will be considered as cash order, only when deposit of 25% is sent with order.

For charge accounts, our term is 60 days net, boxing at cost. New accounts opened only upon receipt of trade references, allowing time for investigation.

Transportation—Please state whether you want your shipments by parcel post, express or freight. When no instructions are given, we will use our best judgment in selecting best method of shipments. We make no charge for delivery to railroad station, but our responsibility ceases when goods are turned over to carrier and risk and cost of transportation belong to purchaser.

Shipping Season—With ordinary weather conditions, from first of November to fifteenth of April.

Claim—If we made any mistakes or any reason to complain, please write immediately upon receipt of goods and we will be pleased to adjust the matter.

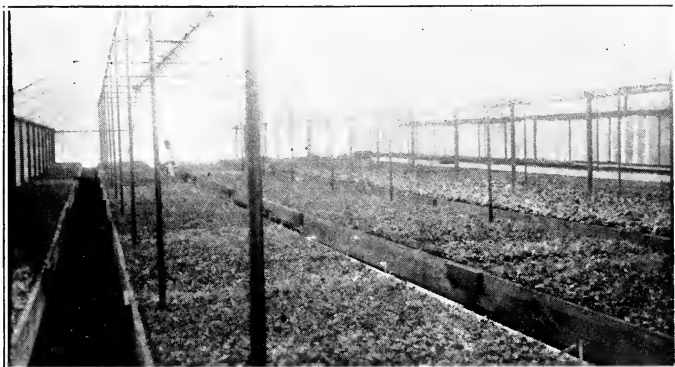

Condition of Sales—We accept all orders upon condition that they shall be void should any injury befall stock from causes over which we have no control.

INDEX

	Page No.

Palms, Vines, Bulbs, Etc.	28-29
Specimen Broad-Leaved Evergreens	30-36
Specimen Coniferous Evergreen	36-40

LINING OUT BROAD-LEAVED EVERGREENS

Plants under this heading will be lifted with almost entire root system intact, puddled immediately in thick mud and packed in moss, except where noted B. & B., which means balled and burlapped.

INTERIOR VIEW OF PROPAGATION HOUSES.
Capacity, One-Third Million Cuttings in One Setting.

Items marked with * and bold type letters are what we call "Junior Specimen Size," which can be shipped safely with puddled roots, yet large enough for landscape work or general retail business because they are sturdy field grown, twice or more times transplanted stock. Florists who have limited growing ground will do well to plant them for only one year before offering them as regular specimen B&B plants.

Abelia Grandiflora.

Our Abelia of larger sizes are many times cut back and pinched, and well branched and bushy.

*2-3 feet, 2-year	15.00	120.00

AZALEAS

Azaleas are without doubt the most beautiful flowering plants we have in the south. Their season of blooming is very long, beginning with winter flowering Vitata Fortuni and extending into June when the pretty dwarf Azalea Macrantha is covered with its soft, orange pink blooms. All azaleas are profuse bloomers and in the spring each plant is a solid mass of color.

Azaleas of all types are easily grown if a few rules are followed. They require a good, well drained soil that has a slight acid reaction. The addition of leaf mould, peat and in very heavy, stiff soil a small quantity of sand is always beneficial. Leaf mould and peat help maintain an acid soil and a mulch of leaves is good to retain

moisture and to furnish plant food for the next year. Azaleas are shallow rooted and an abundance of water in dry weather is necessary, especially with young plants. Watering among foliage with a hose is desirable as a strong spray holds thrip and red spider in check.

Partial shade is desirable in planting but dense shade should be avoided. A lath house is well suited for growing plants on nursery. They should be fertilized sparingly; light application of cotton seed meal about three times a year, is one of the best treatments. It is to be remembered that plants that have a quantity of large sappy growth produce far less flowers and are much more likely to be killed by freezing weather than a slower growing plant of the same variety.

Lining out size Azaleas offered here were rooted in last spring and planted in beds early in summer, giving plenty space for full development of strong root system and bushy tops and far superior to 2½ inch potted plants, having roots enough to fill 3 inch pot which have twice the capacity of 2½ inch pot.

We have thousands of lining out size azaleas ready for immediate delivery but since these small plants have much of tender growth and easily damaged by frost, we advise to protect them against the frost this winter. Extra expense of frost protection will be more than repaid by better growth you will gain by early planting but those who are not prepared to protect them is well to let us book orders and make delivery in spring after all danger of frost is over, without any additional expense to our customers.

AZALEA INDICA

The Indica group which are fast grower with mass of large flowers are especially adapted for landscape planting all along the Gulf Coast up to Atlantic seaboard of North Carolina. Around Mobile, Charleston and some other sections, there are plants of seventy to one hundred years old with spread of twenty to thirty feet across, apparently without any special care, showing they are perfectly at home and easy to grow. Nurserymen in this entire section have golden opportunity of giving most lasting satisfaction to their customers and incidentally enrich themselves by planting extensive collection of this showy plant in their nurseries, because azaleas will sell themselves when your customers see them in full bloom. We are listing most of important varieties, eliminating weaker growers or inferior flowers when same color can be had in better varieties.

Brilliant—A good grower with small dark green leaves. Deep watermelon color, being intermediate of Pride of Mobile and Pride of Dorking. Very good variety.

Criterion—Compact grower with color of strawberry ice cream, streaked with deeper pink and margin of white. Late bloomer and very attractive.

Duc de Rohan—Compact grower with pretty small leaves and profuse bloomer of beautiful salmon pink flowers. One of best plants for pot culture.

Elegance—Fast and rather upright grower similar to Formosa with light colored pink flowers in early season.

Formosa—Very fast grower with large dark leaves and large purplish pink flowers which have less purple than Phoenicia.

George Franc—Early bloomer with extra large salmon pink flowers with deep red throat. Very showy flowers.

Glory of Sunnyhill. Compact grower with shiny narrow leaves and one of the latest to bloom. Vivid orange red color.

Indica Alba—Rather upright grower with dull colored hairy leaves. Pure white flowers in mid season and very hardy.

Iveryana—Similar to Criterion except this variety has pink stripes on pure white instead of pink shade ground of Criterion.

Phoenicia—Fast grower with medium size leaves with flowers of purplish pink which is not often wanted with other colors, but very nice with white flowers and this variety will probably withstand more heat and sun than any others.

Pride of Dorking—One of deepest red of entire group. Blooms late in season and while not very hardy, yet one of the best kind.

Pride of Mobile—Fast grower with large leaves similar to Formosa but of lighter color. Some of largest and choicest azaleas in Mobile section is this variety and was known formerly as "Watermelon Pink," but we gave the name of "Pride of Mobile" two years ago which was immediately adopted by all. Plants of over seventy years old, standing over 15 feet high, smothered by countless beautiful pink flowers is a sight that cannot be equaled by any. Very hardy, fast grower, most brilliant color, mid-season profuse bloomer makes this one of outstandingly good and profitable variety for Nurserymen and Florists to handle.

Praestanssima—Very similar to Pride of Dorking but leaves are more round.

Prince of Orange—Spreading grower with deep orange red flowers of a little after mid-season. Very nice kind.

Salmon—Known locally as "Daphne Salmon." Very hardy mid-season bloomer with pleasing salmon colored medium size flowers.

Vitata Fortuni—Fast upright grower with pale colored leaves. White and lavender variegated and light lavender flowers intermixed. Start blooming in fall and continue all winter and spring.

William Bull—Very hardy upright grower which will not grow compact when small, but after a few years, will form nice compact form. Very double, orange red flowers will last long time and one of the best.

Azalea Indica, 6-8". Yayegiri, 4-6". Hinodegiri, 4-6".
Note mass of roots and sturdy growth which are far superior
to 2½" pot plants.

Prices of Azalea Indica:	100	1000
4-6 inch. Each ball of earth will be wrapped separately, ready now or spring delivery	\$ 8.00	\$ 70.00
6-8 inch, well branched	10.00	90.00

For larger sizes see page 30.

HARDY JAPANESE AZALEAS

What we are listing Hardy Japanese Azaleas and Keampferi include probably largest varieties of best money making possibility to Nurserymen and Florists of southern half of United States than any other group of plants of present day. All of them are evergreen except a few varieties which will lose leaves in New England states, and color range is large—white, pink, salmon, orange, red, and variegated. Certain varieties bloom early, others late, each has its characteristic bloom of its own.

The whole country is sick and tired of evergreens and common flowering shrubs. They are wanting bright colors early in spring and something different and what is better than this group of hardy evergreen azaleas? Most of Nurserymen in this large section of country do not know themselves what a big opportunity is waiting for them to stimulate our trade by offering this bright flowering plant to their customers.

Azaleas under this heading are not dwarf like Hinodegiri or Kurume, but fairly fast grower, making ultimate heights of ten to twelve feet and hardy in all parts of New Jersey and even further north.

Amoena—One of the hardiest compact grower with small leaves and rather small size rosy purple hose-in-hose flowers. Can stand great deal of neglect.

Amoena Superba—Similar to above with the exception of dark purple flower shading darker toward center.

Benigiri—Fast upright grower with large size single bright orange red flowers. Mid-season.

Flame—Bright orange red flower of early season.

Hardy Firefly—Compact growing, very hardy azalea with good size single flower of most brilliant fiery red. One of very best.

Hinamoyo—Fast growing upright branches are clothed with small size light colored leaves. Beautiful shade of soft pink flowers will hide the plant. Bloom early.

Hinodegiri—Slow compact growers, but its fiery red flowers will literally smother the entire plant, even when they are very small, making one of the most desirable pot plants. Since the price is the same, we are putting this variety under this heading for convenience.

Indica Alba—(See under heading of Azalea Indica).

Indica Rosea (Magnificia)—Fast grower with large size hairy leaves. Large single white flowers are tinted with rose.

Keampferi—This evergreen Azalea will lose its leaves in further north, where it can stand winter of Boston without any protection, and does splendidly in lower south, making large size plants. Large size single red flowers born profusely rather late in season.

Kimnazoi—Compact grower with long narrow leaves. Deep red, five separate narrow petals are entirely different from any other Azalea.

Macrantha—Compact grower with roundish leaves with single medium size pink flowers late in season. Very hardy.

Macrantha, Orange Red—Similar to above with narrow leaves and orange red flowers.

Macrantha Double Flowering—One of the above type with double salmon red flowers. Rather new.

Macrostemon Salmoneana—Similar to Macrantha but with larger salmon pink flowers which come in May.

Maxwelli—Leaves and flowers are as large as most of Indica and carmine-red single flowers of large size is very attractive.

Yayegiri—Fast grower with shiny narrow leaves. Beautiful salmon red hose-in-hose flowers in mid-season. Very young and profuse bloomer.

Prices of Hardy Japanese Azaleas:	100	1000
4-6 inch. Each ball of earth will be wrapped separately. Ready now or spring delivery.....	\$ 9.00	\$ 80.00

KURUME AZALEAS

This group, known botanically as *Azalea Obtusum Japonicum*, include varieties of more dwarfish growers and not quite as hardy as Hardy Japanese group, but all Kurume will stand winter of almost all sections of southern states without any protection and much further north with little protection.

Most exquisite and delicate coloring of these flowers, places this group, class by themselves, and while perfectly adapted for landscape use in these sections, they will also make one of showest pot plants because all of them are very floriferous. Do not fail to stock up with some plants because it is one of best coming plants. All varieties listed here are hose-in-hose flowers.

Apple Blossom—Hose-in-hose pink flowers are color of apple blossoms.

Cherry Blossom—Delicate shade of pink melt into white toward center. Large size flowers.

Christmas Cheer—Compact grower with small shiny leaves. Deepest crimson flowers are small but very attractive, and one of best variety.

Coral Bell—Compact grower with small round glossy leaves have dainty bell shaped pink flowers which are not large but very profuse bloomer and one of best favorite with florists.

Double Rose—Medium size flowers are very pleasing shade of rose color.

Orange Beauty—Orange pink colored flowers are large and borne in large clusters. Very beautiful.

Peach Blow—Beautiful shade of peach blossom color with good size flowers and rather fast grower. One of the best.

Pink Pearl—Large size, most beautiful salmon-rose color is shaded lighter toward center with prominent markings. Borne in large cluster.

Salmon Beauty—Size and shape of flowers similar to above with salmon-pink color. One of the best.

Snow—Purest snow white, good size flowers are borne very profusely and liked by all.

Prices of Kurume Azaleas:	100	1000
3-5 inch. Each ball of earth will be wrapped		
separately. Ready now or spring delivery	\$11.00	\$100.00

Barberry Atrocarpa (Barberry Sargentii).

Compact growing shrub so well adapted for foundation planting and this is one of a few Barberries which is at home in lower south. Numerous golden yellow flowers in early spring.

4-6 inch, C. T.	\$ 5.00	\$ 40.00
6-8 inch, C. T., 2-year	7.00	50.00
8-12 inch, C. T., 2-year	10.00	80.00
*12-15 inch, TT, field	12.00	

Buxus Japonica (Japanese Box).

Much faster grower than other Boxes with light green roundish leaves. Does well in full sun on gulf coast. Makes splendid trimmed specimen but untrimmed, they will make ideal plants for foundation planting.

	100	1000
3-5 inch, C. T.	4.00	30.00
6-8 inch, C. T.	6.00	50.00

Buxus Sempervirens.

Slow growing tree box which will do well in shade in lower south than in open. Our strain is compact growing with thick dark green foliage.

4-6 inch, C. T.	4.00	30.00
----------------------	------	-------

BLOCK OF SPECIMEN CAMELLIAS

Camellia Japonica.

Waxy leaf, mid-winter flowering Camellia, needs no description. We grow only double flowering choice kinds which we offer under color of White, Pink, Red and Variegated because as yet, we are not certain of names of many varieties. Many splendid varieties.

	100	1000
8-10 inch, C. T., B&B	25.00	225.00
10-12 inch, C. T., B&B	30.00	250.00
12-15 inch, C. T., B&B	35.00	300.00
15-18 inch, C. T., B&B, branched	60.00	

Camellia Sasanqua.

Similar to Camellia Japonica but more of shrubby effect, growing fast, freer from scale injury, and bloom in October and November. We offer **Mine-no-yuki** which is double white flowers similar to Carnation, and **Rosea**, a large single pink flower with prominent stamens, similar to Cherokee Rose.

6-8 inch, C. T.	10.00	80.00
8-12 inch, C. T.	12.00	100.00

Camellia Sasanqua Seedlings.

They will mostly have white flowers and compact fast grower. In Japan all Camellia Japonica are grafted on C. Sasanqua roots and ideal grafting stock.

6-8 inch	5.00	40.00
8-12 inch	8.00	70.00

Camellia Thea (Tea Plant).

This compact growing hardy evergreen shrub is not known widely, but has many desirable quantities. Sweet scented white flowers in late fall.

	100	1000
4-6 inch, seedlings	3.00	20.00
6-8 inch, seedlings	4.00	30.00
8-12 inch, seedlings	5.00	40.00
*12-18 inch, TT.....	10.00	

Cleyara Japonica.

Has thick, glossy leaves which turn red before dropping off. New growth is brown and quite hardy, withstanding cold of Atlanta and further north. One of the best newer evergreen.

4-6 inch, C. T.	8.00	70.00
6-8 inch, C. T., 2-year	10.00	80.00
8-12 inch, C. T., 2-year	12.00	100.00

Cotoneaster Franchetti.

One of the best Cotoneaster in lower south, with bright green leaves and compact grower.

6-8 inch, seedlings	5.00	40.00
8-12 inch, seedlings	7.00	50.00
*12-18 inch, T., field, bushy	15.00	

Daphniphyllum Macropodium.

Evergreen small size tree with glossy large size round leaves of highly ornamental value. Very new.

4-6 inch, from seed	15.00
6-8 inch, from seed	20.00

Eleagnus Pungen Reflexa.

Compact growing Eleagnus of bronze color. These little plants we are offering are very nice bushy plants with many branches.

6-8 inch, C. T.	6.00	50.00
8-10 inch, C. T.	8.00	60.00
10-15 inch, C. T., 2-year	10.00	

Eleagnus Pungen Variegata (Variegated Russian Olive).

Herdy compact growing shrub succeeding in wide range of country. Beautiful variegation will not be affected by sun nor winter and quite valuable plant. We can furnish in both gold and silver variegated.

4-6 inch, C. T.	10.00
6-8 inch, C. T.	12.00

Euonymus Carrieri.

Low growing shrub with shiny green leaves which will turn bronze during winter. Extremely free from insects and diseases and ideal plants for border, doing well under the sun or in shade.

8-12 inch, C. T.	5.00	30.00
12-18 inch, C. T.	6.00	40.00

Euonymus Kewensis.

Thread like vines clothed with tiny leaves, making very nice plant for ground cover and rock gardens.

6-8 inch, C. T.	5.00	40.00
----------------------	------	-------

Gardenia Florida.

Demand for this white flowered sweet scented Cape Jasmine is increasing again.

8-12 inch, C. T.	6.00	50.00
12-18 inch, C. T.	8.00	70.00

Gardenia Radicans (Dwarf Cape Jasimine).

Miniature Cape Jasimine adapting well for border and rock gardens.

	100	1000
4-6 inch, C. T.	6.00	50.00
*8-12 inch, TT., Field	10.00	

Ilex Cassina Angustifolia.

This narrow leaf Dahoon Holly is a fast grower with leaves of two to three inches long. Very large red berry bearer. What we are offering are cuttings taken from bearing plants.

6-8 inch, C. T.	10.00	80.00
8-12 inch, C. T.	12.00	100.00

Ilex Cornuta Femina (Chinese Holly).

Dark green leaves with strong spines are so glossy that they look like waxed, and bears red berries. Showest holly in south and perfectly at home from gulf coast to New Jersey. We are offering plants grown from bearing stock plants.

6-8 inch, C. T.	15.00	130.00
3-inch pot, C. T., 6-12 inch	25.00	200.00
3-5 inch, fine seedlings	6.00	50.00

Ilex Crenata.

Small leaved dwarf shrub withstanding the winter of New Jersey and quite at home on gulf coast. Berry is black but plants are very hardy and attractive. Our cutting grown plants are from a strain with specially attractive dark green serrated leaves.

2-4 inch, seedlings	2.00	15.00
4-6 inch, C. T.	5.00	
6-8 inch, C. T., 2-year	8.00	

Ilex Crenata Bullata.

An excellent new variety with leaves of high gloss and convex in center. Largely used in Japanese gardens. Supply is very limited.

2½ inch pot, C., T.	15.00	
--------------------------	-------	--

Ilex Crenata Rotundifolia (Round Leaf Japanese Holly).

Leaves are larger and rounder than type and very compact grower. One of the best plants for foundation planting, being semi-dwarf grower. What we are offering are plants with several branches.

4-6 inch, C. T.	5.00	40.00
6-8 inch, C. T.	8.00	60.00
8-12 inch, 2-year	10.00	80.00
*12-15 inch, TT.	15.00	

Ilex Integra.

Glossy green oblong leaves are serrated and about one and half inch long. Heavy bearer of showy red berries, and bound to be one of the favorite when better known.

3-5 inch, seedlings	6.00	50.00
5-8 inch, seedlings	8.00	70.00

Ilex Opaca (American Holly).

Well known native plant of high decorative value more appreciated in recent years. Cuttings were taken from good bearing specimen.

6-8 inch, C. T.	10.00	80.00
8-12 inch, C. T.	12.00	100.00
12-15 inch, C. T.	15.00	
We offer once transplanted seedlings at		
8-10 inch, S. T.	5.00	40.00
10-15 inch, S. T.	7.00	60.00

Ilex Vomitoria (Yaupon).

Native of Southern United States, succeeding in wide range of country. Small bright red berries at Christmas time. Cutting grown plants are from berry bearing specimen.

	100	1000
4-6 inch, C. T.	8.00	
6-10 inch, C. T.	10.00	
10-15 inch, C. T.	12.00	
10-15 inch, Seedling, T.	6.00	

Jasiminum Floridum.

Semi-erect Jasimine with dark green leaves and hardy as far north as Long Island. Sweet scented yellow flowers are produced quite freely.

8-12 inch, C. T.	6.00	50.00
12-15 inch, C. T.	8.00	70.00

Jasiminum Primullinum (Primrose Jasimine).

Graceful half elect evergreen with yellow Jasimine flowers. Excellent for foundation planting between more stiff plants.

6-8 inch, C. T.	3.50	30.00
12-18 inch, C. T.	5.00	40.00

Lauruscerasus Carolinana (Cherry Laurel).

Our Native Evergreen shrub or small tree, remarkably free from attack of insects or diseases. Makes very nice specimen or hedge plant.

6-8 inch, seedlings	3.00	20.00
8-12 inch, seedlings	5.00	30.00
*12-18 inch, T., Field	10.00	

Laurus Officinale (English Laurel).

Shrub of medium size with large waxy leaves. Hardy in Tennessee and do splendidly in Gulf Coast. One of the most valuable broad leaves evergreen for almost entire south.

4-6 inch, C. T.	7.00	50.00
6-8 inch, C. T., 2-year	10.00	80.00
8-12 inch, C. T., 2-year	12.00	
*12-18 inch, C. TT., Field	20.00	

Laurus Nobilis (Grecian Bay).

Noted by its aromatic leaves which is often used for cooking. Used extensively for tub plants in northern cities.

6-8 inch, C. T., 2-year	8.00	
8-10 inch, C. T., 2-year	10.00	

Ligustrum Coriaceum (Dwarf Privet).

Very dwarf, slow growing privet with round crinkled thick foliage and very distinct. Good for rock garden. Scarce.

4-6 inch, C. T.	8.00	
----------------------	------	--

Ligustrum Delavayanum and Ligustrum Ionandrum.

Both of these are recent introduction by government, both having small evergreen leaves of about Abelia size, quite bushy and dwarfish grower. Said to be quite hardy and worthy of careful trial in southern half of United States.

6-8 inch, C. T.	6.00	
8-12 inch, C. T.	8.00	

Ligustrum Japonicum.

Fast growing Ligustrum of small size trees. Can be trained into bush or tree forms and useful as screen planting.

6-8 inch, seedlings	2.00	15.00
8-12 inch, seedlings	3.00	20.00
*12-18 inch, T., Field	7.00	60.00

Ligustrum Ciliatum Variegatum.

Compact growing plants with arched branches with small roundish leaves which are faintly blotched.

Ligustrum Henrii.

Dark glossy leaves are no larger than your finger nail size and will make an ideal sheared plant. Not so well known.

Ligustrum Lucidum Compactum (Wax-leaf Privet).

Under this name many plants are offered, including seedlings which do not come true, but what we are offering are dwarf growing shrubs with very thick heavy leaves of extremely glossy surface. One of the most satisfactory plants for general planting, being free from attack of insects and diseases and fast grower, doing well in most adverse conditions. Our plants are well vinched back, having many branches and last two grades can be used for landscape work.

JUNIOR LIGUSTRUM

Ligustrum Lucidum Pyramidalis (Upright Privet).

Leaves are more pointed and the growth is decidedly upright. We have two other varieties of upright privet but discarding them because this variety is so much more superior to others.

Ligustrum Lucidum Repanda (Crinkle Leaved Privet).

Shiny narrow leaves are crinkled and growth is somewhat more upright, making quite distinguished looking plant.

Prices of Ligustrum Ciliatum Variegatum, Ligustrum Henrii, Ligustrum Lucidum Compactum, Ligustrum L. Pyramidalis, Ligustrum L. Repanda.

12-18 inch, S., 2-year	8.00	60.00

Magnolia Grandiflora.

We gather our seeds from only three isolated grand specimen of exceptional merit, with very large fine foliage.

3-6 inch, S.	4.00	30.00
-------------------	------	-------

Magnolia Soulangiana and other valuable deciduous kinds, see page 25.

Mahonia Bealei (M. Japonica).

Similar to Nandina with holly-like compound leaves. Panicle of yellow flowers in winter followed by cluster of purple berries in spring. Does well in lower south.

4-6 inch, S. T.	8.00	
6-8 inch, S. T.	10.00	

Malpighia Glabra (Barbade Cherry).

Compact growing dwarf evergreen with small size pink flowers similar to Crape Myrtle, followed by red berries. Not hardy but when killed back by frost they will send new shoots and bloom same summer.

8-12 inch, C. T.	8.00	
*10-15 inch, TT., Field	12.00	

Nandina Domestica.

The supply has never kept up with the demand for this popular plant, but we are offering them at very attractive prices.

2-4 inch, seedlings	2.00	15.00
4-6 inch, S. T.	5.00	40.00
6-8 inch, S. T.	6.00	50.00
8-12 inch, S. T.	10.00	90.00
*12-15 inch, TT., Field	15.00	130.00
*15-18 inch, TT., Field	20.00	180.00

Osmanthus Americana.

Rather fast growing large size shrub with attractive serrated leaves. Small fragrant flowers in late fall. Very hardy.

Osmanthus Fortunei (Holly-leaf Tea Olive).

Compact growing small trees, attaining the height of 25 feet, clothed with thick spiny-toothed green leaves. Hardy as far north as Washington, D. C.

Prices of both Osmanthus mentioned above.

	100	1000
4-6 inch, C. T.	8.00	
6-8 inch, C. T.	10.00	
8-10 inch, C. T., 2-year	15.00	

Osmanthus Fragrance (Sweet Olive).

Well known southern evergreen with creamy white flowers in winter which are delightfully fragrant and hardy south of Birmingham.

4-6 inch, C. T.	6.00	50.00
6-8 inch, C. T.	8.00	70.00
8-10 inch, C. T.	10.00	90.00
*12-18 inch, TT., Field	20.00	

Photinia Glabra.

An evergreen with attractive new growth, deep red color, which is ideally suited for clipped hedge or specimen. Should be pruned often to keep plants bushy and encourage new growth. Our cuttings are from best specimen with deepest red new growth.

6-8 inch, C. T.	5.00	40.00
8-10 inch, C. T.	6.00	50.00
10-15 inch, C. T., 2-year	8.00	70.00
15-18 inch, C. T., 2-year	10.00	80.00
*18-24 inch, TT., Field	15.00	

Photinia Serrulata (Low Photinia).

Large leathery leaves are toothed finely and new growth is brownish red color. Coming into greater favor every day.

2-4 inch. seedlings	3.00	20.00
4-6 inch, S. T., 2-year	5.00	40.00
6-8 inch, S. T., 2-year	7.00	60.00
8-12 inch, S. T., 2-year	9.00	80.00
*12-18 inch, TT., Field	15.00	

Pittosporum Tobira.

One of best evergreen withstanding many hardships, such as poor sandy soil, under the shade of trees, and sea-shore plantings.

Rooted cuttings, now ready	3.00	25.00
4-6 inch, C. T.	5.00	40.00
6-8 inch, C. T.	6.00	50.00
8-10 inch, C. T.	8.00	60.00
*12-15 inch, TT., Field	20.00	

Pittosporum Tobira Variegata.

Variegated form of above, not quite as hardy and slower in growth.

4-6 inch, C. T.	7.00
----------------------	------

Pyracantha Coccinea Lalandi (Evergreen Hawthorn).

Desirable evergreen with cluster of orange colored berries which color up in summer and hang on a long time.

Pyracantha Formosana.

Compact and fast growing Pyracantha with small holly like leaves and red berries. This is the outstandingly good variety of all Pyracantha, having large scarlet berries which is produced in enormous clusters.

Pyracantha Kansuensis.

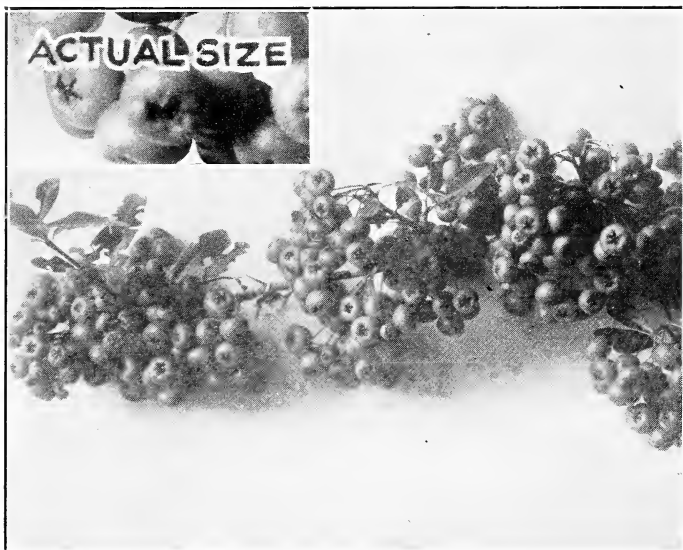

New introduction by government which have very small leaves and scarlet berries.

Pyracantha Yunnanensis.

Spreading kind with broader smooth leaves and coral red berries. Not so susceptible to attack of scale insects.

Prices of all knids of *Pyracantha*:

	100	1000
6-8 inch, C. T.	5.00	40.00
8-12 inch, C. T.	7.00	60.00
12-18 inch, C. T.	10.00	80.00

PYRACANTHA FORMOSANA

Quercus Acuta (Japanese Live Oak).

Hardy evergreen oak of Japan, used largely for ornamental purpose, having rich green foliage.

Quercus Cuspidata.

This is another Japanese evergreen oak with smaller, thick leaves and used more largely for garden and hedge work. The acorn is edible.

Quercus Glabra.

Another hardy Japanese evergreen oak very similar to *Q. Acuta*. New growth is pretty brownish color.

Prices of all three Japanese live oaks:

	100	1000
8-12 inch, S., 2-year	5.00	40.00
12-18 inch, S., 2-year	7.50	60.00

Raphiolepis Indica (Indian Hawthorn).

Slow growing evergreen with roundish, thick leaves with numerous pinkish white flowers in spring followed by purple berries.

4-6 inch, S., 2-year	4.00	30.00
6-8 inch. 2-year	6.00	

Serissa Foetida Variegata.

A low growing spreading shrub with tiny green leaves of yellow margin. Pretty trumpet shaped white flowers. Very desirable as border or where plants of less than two feet is wanted.

6-8 inch, C. T.	5.00	30.00
12-15 inch, C. T.	8.00	60.00

Viburnum Macrophyllum.

Large shiny leaves are about six inches long. Medium size shrub; not hardy more than middle of Georgia but quite useful and beautiful plant farther south.

6-8 inch, C. T.	6.00	50.00
8-12 inch, C. T.	8.00	70.00

Viburnum Odoratissimum.

Fast growing medium size shrub with large laurel like leaves, doing well in almost any location in the south. White, good smelling flower.

6-8 inch, C. T.	6.00	50.00
8-12 inch, C. T.	8.00	70.00
*12-18 inch, C. T.	10.00	80.00

Viburnum Suspensum.

Compact rather slow growing plants with attractive leaves and pretty flowers in early spring.

4-6 inch, C. T.	6.00	
6-8 inch, C. T.	8.00	

Viburnum Tinus (Laurestinus).

Compact, growing rather small shrub with small shiny dark green leaves. Bloom pinkish white flowers during winter months. One of the most desirable plants.

4-6 inch, C. T.	4.00	30.00
6-8 inch, C. T.	7.00	60.00

LINING OUT CONIFERS

Baker's
15-18 inch

JUNIOR SPECIMEN PLANTS
Spiny Creek **Pfitzer**
10-12 inch 12-15 inch

Berckman's Golden
10-12 inch

Plants under this heading will be dug bare roots, saving almost entire root system. Puddled immediately so that you will receive plants with original moisture on roots.

Consideration of price is an important item when competition is strong, but do not let only lower prices blind you because almost all our lining out size plants were rooted in the fall and transplanted in early spring, giving them plenty room to develop full root system and stocky tops, for an entire growing season and entirely different plants from summer rooted cuttings transplanted in the late fall, merely to call them as once transplanted or potted, or those plants grown in crowded flats to let them get height but slender and "leggy." We give 20 square inches (about 4½ inches square) for each bedded plant, while most other nurseries allow them only 3 to 5 square inches.

Items marked with * and bold type letters are what we called "Junior Specimen Size" which can be shipped safely with puddled roots, yet large enough for landscape works or general retail business because they are sturdy field grown, twice or more times transplanted stock.

	100	1000
Cedrus Deodara.		
4-6 inch, S.	\$ 4.00	\$30.00

BLOCK OF MAGNOLIA LILIFOLRA and SOULANGEANA NIGRA

Magnolia Liliflora (M. Obovata).

Tulip-shaped flowers appear before the leaves and one of the most sought after plants of today. Plants are rather bushy in form, sending many branches from ground. Blooms later than Magnolia Soulangeana, and make nice companion plants. We produce these plants by tens of thousands that for the first time in this country since quarantine, these plans are offered at prices one can buy and resell at profit.

Magnolia Soulangeana Nigra.

Similar to above but more of tree form in habit and much darker purplish pink flowers.

Prices of both varieties for plants with one to three stems:

	10	100
6-8 inch, C., T., bed grown	3.00	25.00
12-15 inch, TT., Field	4.00	35.00
15-18 inch, TT., Field	5.00	45.00
18-24 inch, TT., Field	6.50	60.00

Specimen sizes with three to seven stems:

12-18 inch, B&B	10.00	80.00
18-24 inch, B&B	12.50	100.00
2-3 feet, B&B	17.50	150.00
3-4 feet, B&B	25.00	200.00

Magnolia Soulangeana.

Well known, highly prized plants with pinkish white flowers.

Specimen plants with two or more branches:

18-24 inch, B&B	17.50
2-3 feet, B&B	25.00
3-4 feet, B&B	35.00

Malus, Flowering Crab-apple.

A group of very showy flowering plants with color range of white to brilliant carmine. All our plants are grafted on apple roots and can furnish in following kinds:

Atrosanguinea (Brilliant Carmine).

Coronaria (White and pink flowers, very fragrant).

Floribunda (White flowers with pink buds).

Micromalus (pink flowers, dwarf grower).

Niedzwetzkyana (deep red, early).

Scheideckeri (pink flowers).

	10	100
1-2 feet	2.00	15.00

Prunus Grandulosa (Flowering Almond).

Dwarf bush is covered with pink flowers in early spring before leaves appear.

18-24 inch	2.50	20.00
------------------	------	-------

Prunus Tomentosa (Nanking Cherry).

A very desirable shrub with small white flowers followed by showy edible red fruits.

12-18 inch	2.00	15.00
18-24 inch, bushy	2.50	20.00

Prunus Triloba Plena (Double Flowering Plum).

Profusion of double pink flowers cover the entire plant in early spring.

18-24 inch	2.50	20.00
------------------	------	-------

Spirea Anthony Waterer.

15-18 inch, very bushy, TT.	1.75	12.50
18-24 inch, very bushy, TT.	2.25	17.50

Spirea Koreana (S. Trichocarpa).

New and great improvement over Spirea Van Houtte.

6-8 inch, C., T.	1.00	6.00
-----------------------	------	------

Spirea Prunifolia (Bridal Wreath).

18-24 inch, Field	1.50	10.00

Sterculia Plantanifolia (Japan Vanish Tree).

Fast growing umbrella shaped tree with large size leaves and smooth green bark. Makes ideal avenue trees.

8-12 inch, S.75	5.00
12-18 inch, S.	1.00	7.00

Wisteria Multijuga Rosea (Pink Wisteria).

1-year, C., T.	2.00	15.00
2-year, Grafted, Field	6.00	50.00

PALMS, VINES, BULBS, ETC.

Amaryllis Vitata.

Hybrid of all sorts ranging in color from white to deepest red and intermediate colors. Very large flowers with wide petals.

	10	100
One-year old seedlings	\$.75	\$ 5.00
Two-year old seedlings	1.00	7.00
4-5 year old blooming bulbs.....	4.50	30.00

Aspidistra Lurida.

Well known decorative plants withstanding almost any degree of neglect, admirably adapted for hotel lobbies, dark halls, etc.

Price per good leaves60	4.00
-----------------------------	-----	------

Bambusa Argentea.

A clump bamboo with small green canes with green leaves. Very nice for screen.

Good size clumps, B&B	2.50	20.00
-----------------------------	------	-------

Bambusa Disticha.

Smaller than above with ultimate heights of 12 feet, with very fine leaves of highly ornamental value.

Good size clumps, B&B	3.00	25.00
-----------------------------	------	-------

Bignonia Speciosa.

Evergreen vine with showy large green leaves and mass of large size purple flowers in spring.

12-15 inch, C., T.	1.00	8.00
18-24 inch, C., TT., Field	3.50	25.00

Chamaerops Excelsa Palms (Wind-mill Palm).

Very hardy, fan-shaped leaf palms with slender trunk, well adapted for street plantings.

	10	100
6-8 inch, 3-year seedlings		4.00
8-12 inch, 3-year seedlings		6.00
Specimen size from field:		
18-24 inches high, B&B	10.00	
2-3 feet, B&B	15.00	
3-4 feet, B&B	20.00	

Cocos Australis Palms.

Recurved leaves are glaucous and very graceful. This is rather a slow grower but never get out of bound and ideal for lawn specimen. Can stand much more cold than Washingtonia and Phoenix palms.

8-12 inch, 3-year seedlings		6.00
12-18 inch, 3-year seedlings		8.00
Specimen Cocos Palms from field:		
12-18 inches in height, B&B	10.00	
18-24 inch, B&B	12.50	
24-30 inch, B&B	15.00	

Cortaderia Argentea (Pampass Grass).

Aristocrat of grass, having immense size plumes of commercial value. Will make one of the most beautiful specimen on lawn.

Good size clump	3.50	25.00
Good size division	2.00	15.00

Hemerocallis (Day Lily).

We can furnish this desirable perennial in following varieties:

Apricot, low growing early bloomer.

Aurantica, deep reddish orange.

Florham, large rich golden yellow.

Fulva, large orange yellow.

Gold Dust, golden yellow.

Kwanso, double flowering kind of Fulva.

Minor, golden yellow. Early.

	10	100
Medium division	1.00	7.50

Milletia Japonica (Formosa Wisteria).

Vine with compound evergreen leaves and deep purple flowers produced freely during summer months are very much like ordinary Wisteria. Only offered by two or three firms in this country yet.

6-8 inch, C., T.	1.50	10.00
8-12 inch, C., T.	2.00	12.00
18-24 inch, C., TT., Field	3.00	20.00

Ophiopogon Japonicum (Dragon's Beard).

A very low grass like evergreen with spikes of purple flowers, doing well either in dark shade or in full sun. Very valuable as border plants.

Small division	2.00
Large division	3.00

Philostachis Aurea (Giant Japanese Bamboo).

Large growing hardy bamboo, well adapted for southern United States.

Underground canes	1.50	10.00
-------------------------	------	-------

Trachelospermum Jasminoides Microphyla (Dwarf Confederate Jasmine).

Vine with small thick evergreen leaves and very fragrant white flowers.

12-18 inch, C., T.	1.25	10.00
-------------------------	------	-------

Wisteria, see page 27.

Yucca.

We are pleased to offer the following varieties of this valuable plant, in specimen field grown plants.

Yucca Aloefolia.

Yucca Filamentosa.

Yucca Louisianensis.

Yucca Recurvifolia.

12-18 inch, B&B	5.00
-----------------------	------

18-24 inch, B&B	7.50
-----------------------	------

Y. Filamentosa is 25% cheaper than above prices.

SPECIMEN BROAD-LEAVED EVERGREEN

All plants listed here are more than twice transplanted, field grown, bushy and compact specimen, most of them pinched back several times. Not all southern Alabama soil is sand, but we specially selected our specimen field which is away from our home nursery, with stiff clay soil which will hold the ball well.

Write for very attractive prices for carload orders or on large requirements. All prices include B&B unless otherwise mentioned.
